Introduction

The study asks how structured reading supports understanding.

The method uses a controlled experiment.

Participants read scientific papers with a structured guide.

The evidence supports improved comprehension in this sample.

The sample is small and external validity remains uncertain.

Future work should test the method in different disciplines.

This is page 1 of the local test document.

Methods

The study asks how structured reading supports understanding.

The method uses a controlled experiment.

Participants read scientific papers with a structured guide.

The evidence supports improved comprehension in this sample.

The sample is small and external validity remains uncertain.

Future work should test the method in different disciplines.

This is page 2 of the local test document.

Results and Discussion

The study asks how structured reading supports understanding.

The method uses a controlled experiment.

Participants read scientific papers with a structured guide.

The evidence supports improved comprehension in this sample.

The sample is small and external validity remains uncertain.

Future work should test the method in different disciplines.
